

Freestanding Column (mobile/relocatable)

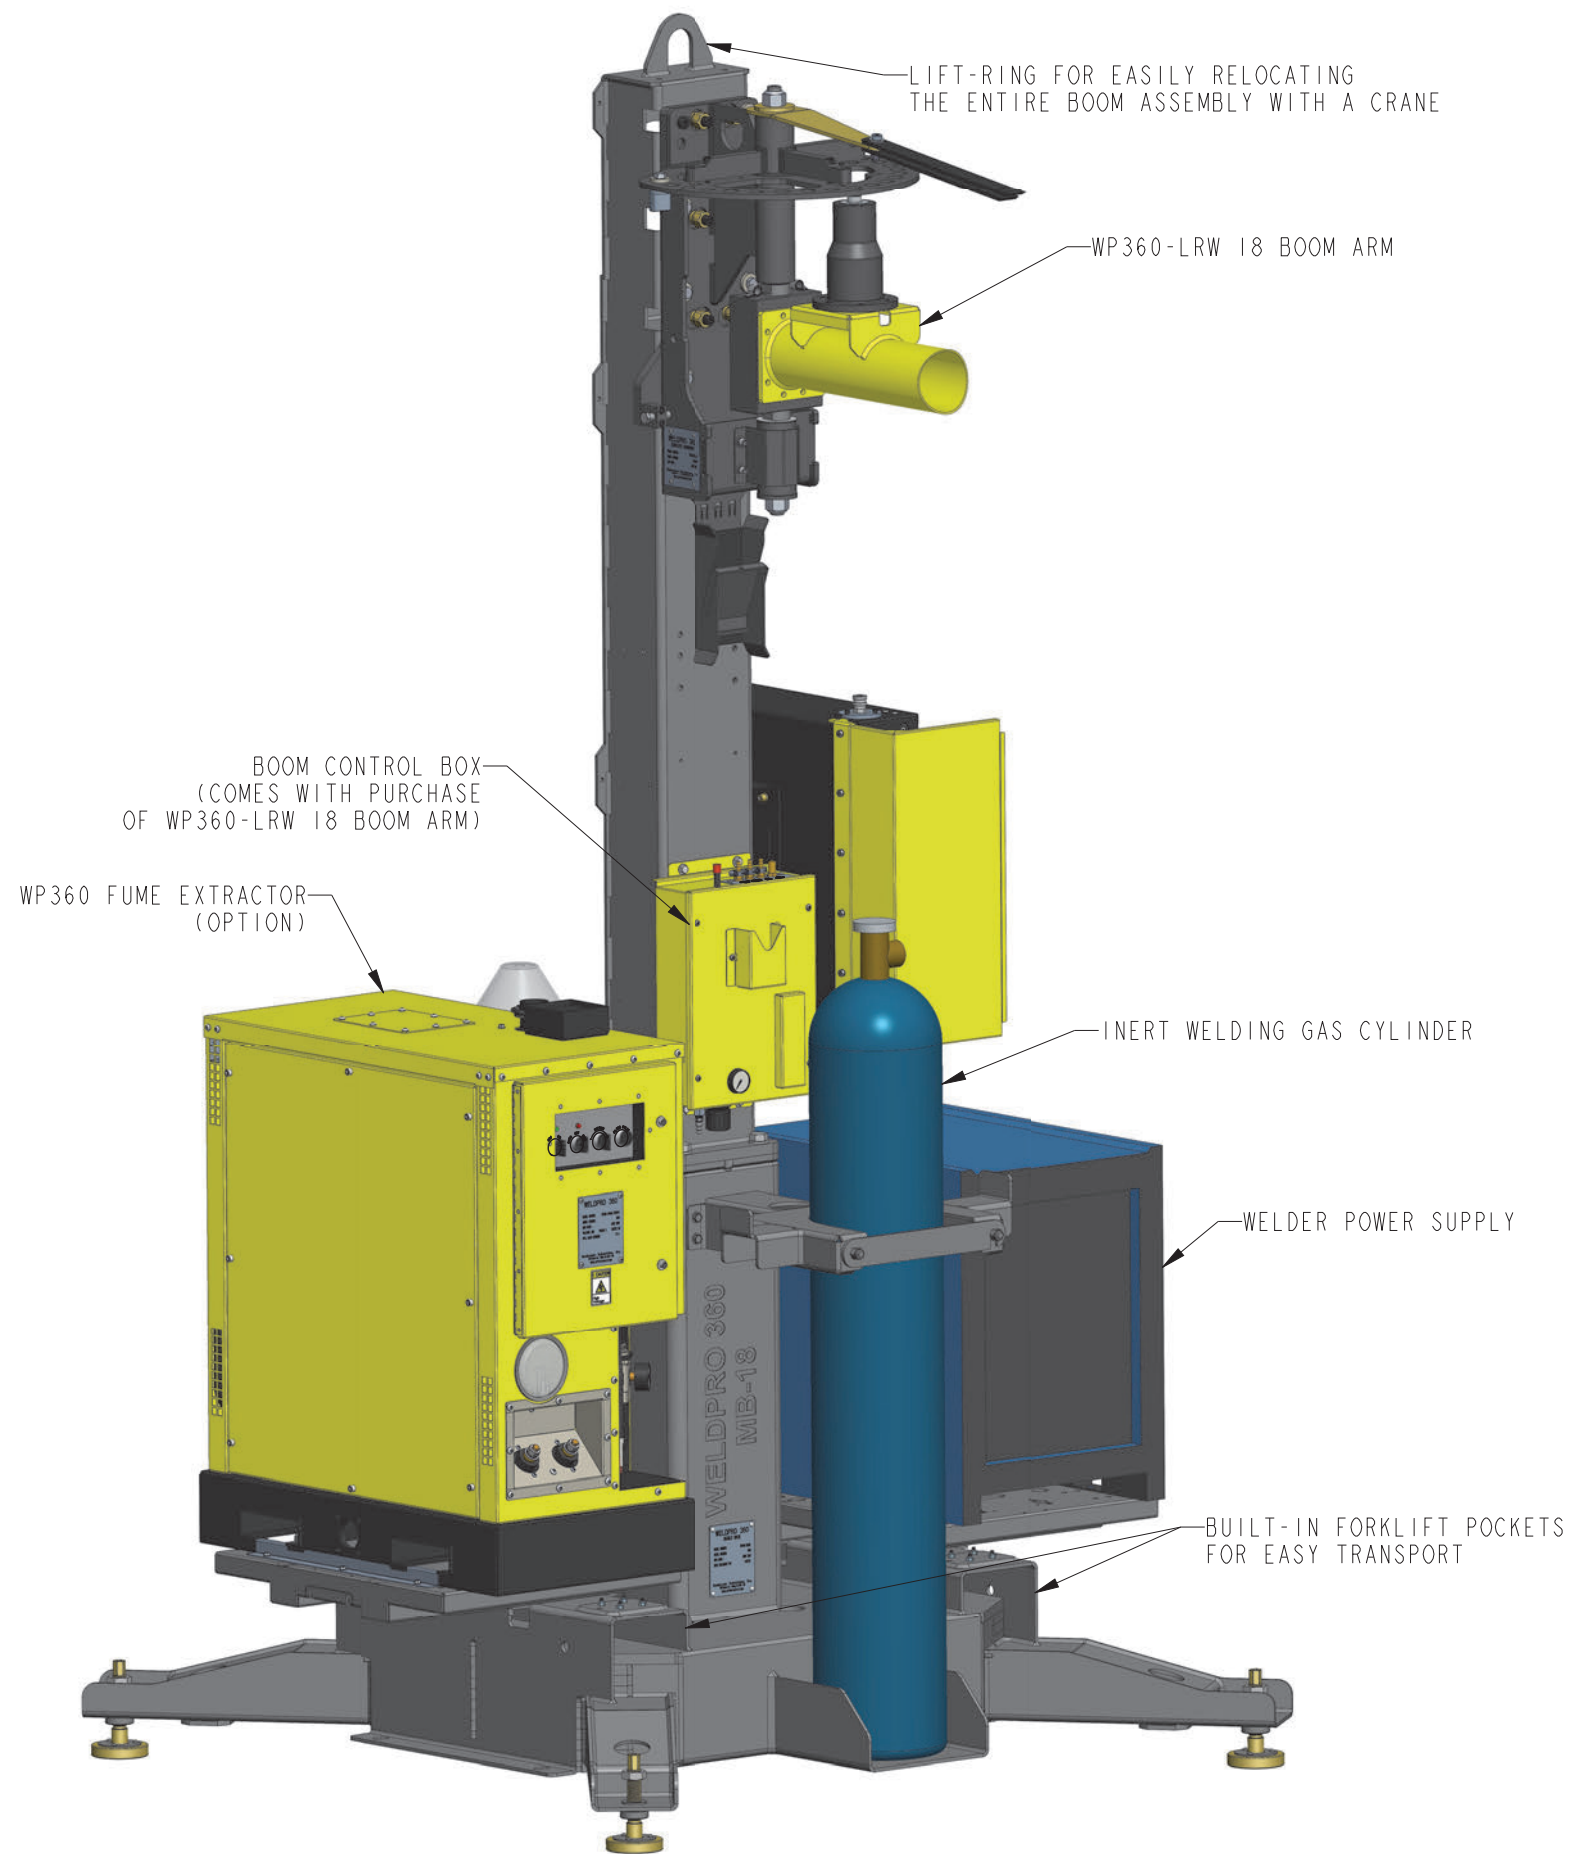

The WeldPro 360 lineup, offers a counter-balanced (weighted base), free-standing column that requires no building modifications and is fully mobile and easily re-locatable. This free-standing column comes standard, with a welder power supply mount and an inert gas cylinder mount built-in. Available are a full complement of optional bolt-on brackets for mounting all components allowing customizable installations. Its advantage is in its extremely fast setup and can be located and re-located with a forklift or overhead crane in minutes. The entire column and each of the high-quality mounting brackets are powder coated for a finished look and long-term durability.

- Requires only basic hand tools to install.
- Provides fast setup time for your boom arm (can be installed and operational in 1 day).
- Moving to a new location in the future is a 10-minute process.
- The column comes with pre-engineered, drilled and tapped mounting locations for all bolt-on options.
- Advantage – a mobile, self-contained, well-organized installation with everything off the floor.

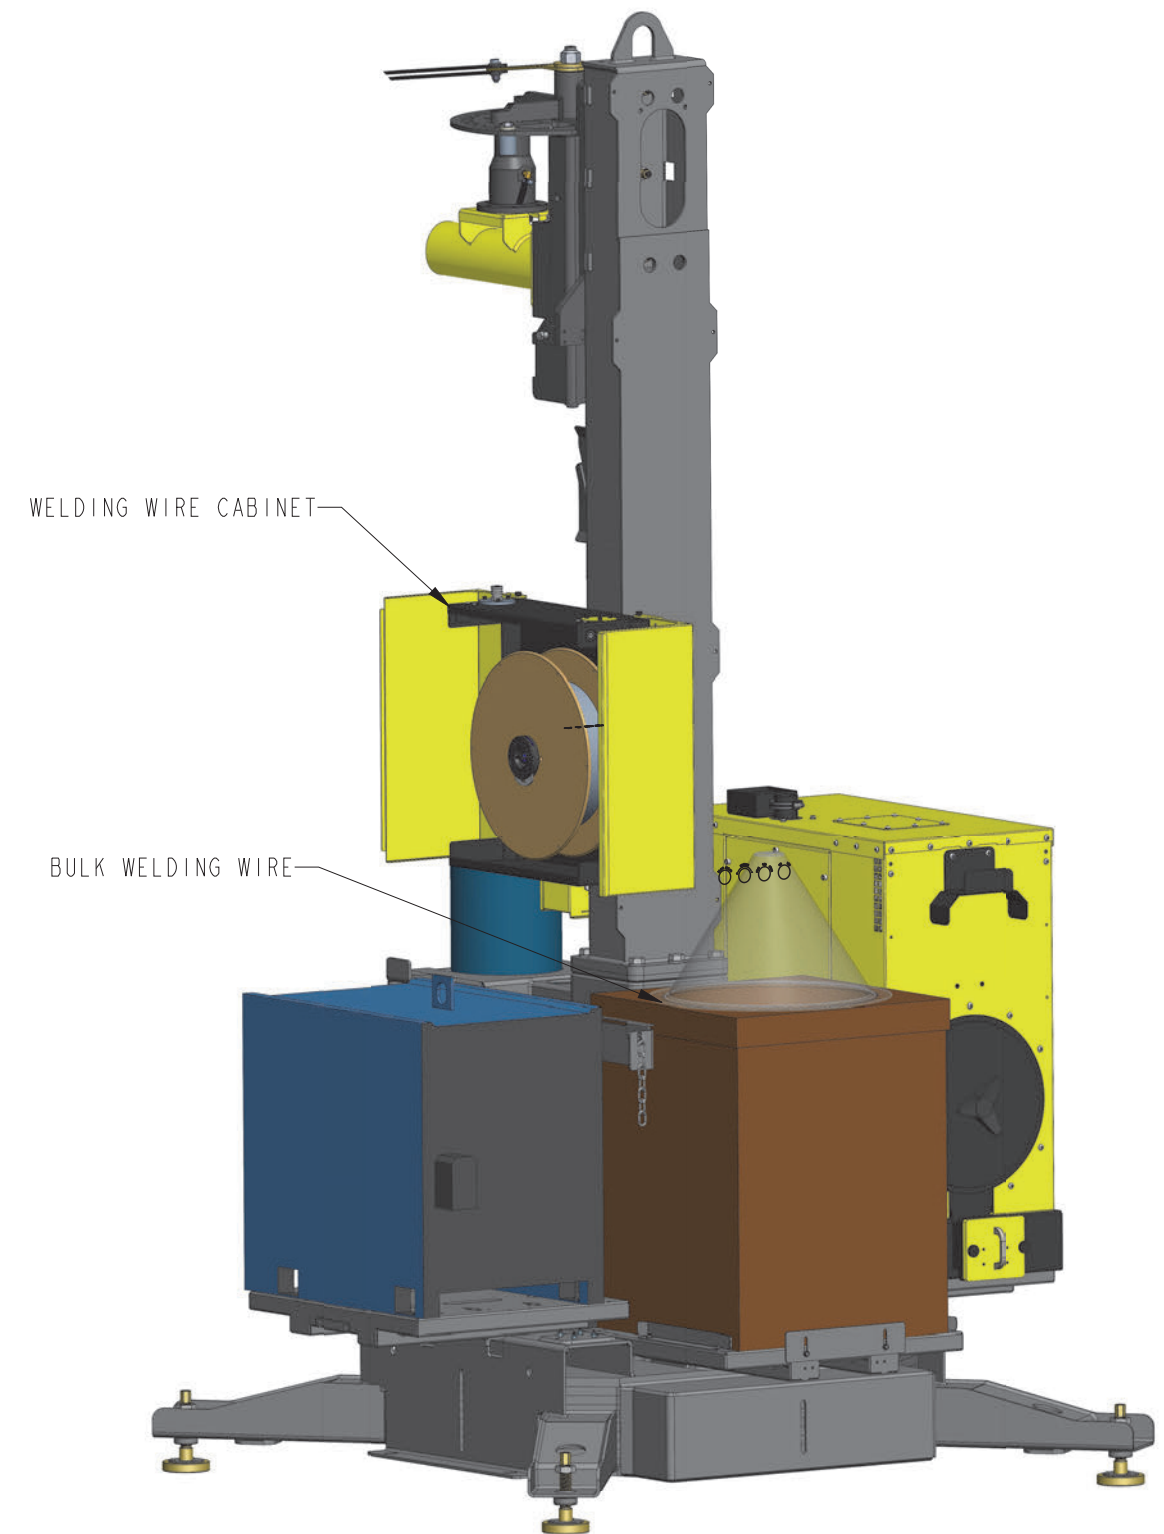

Mounting Bracket Options

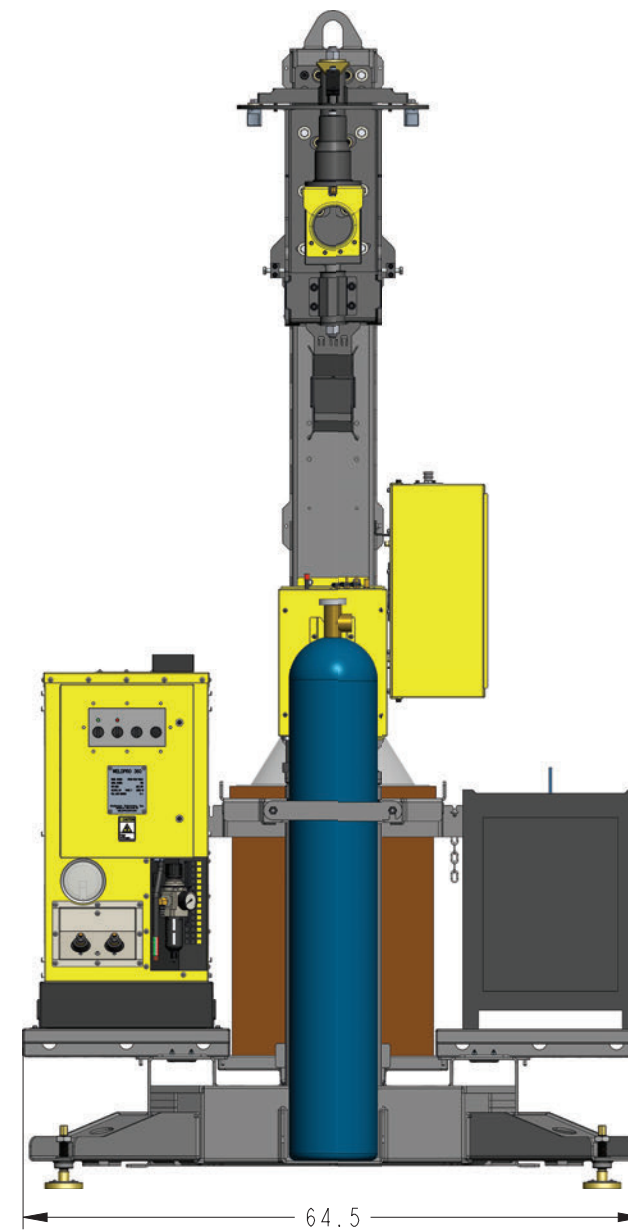

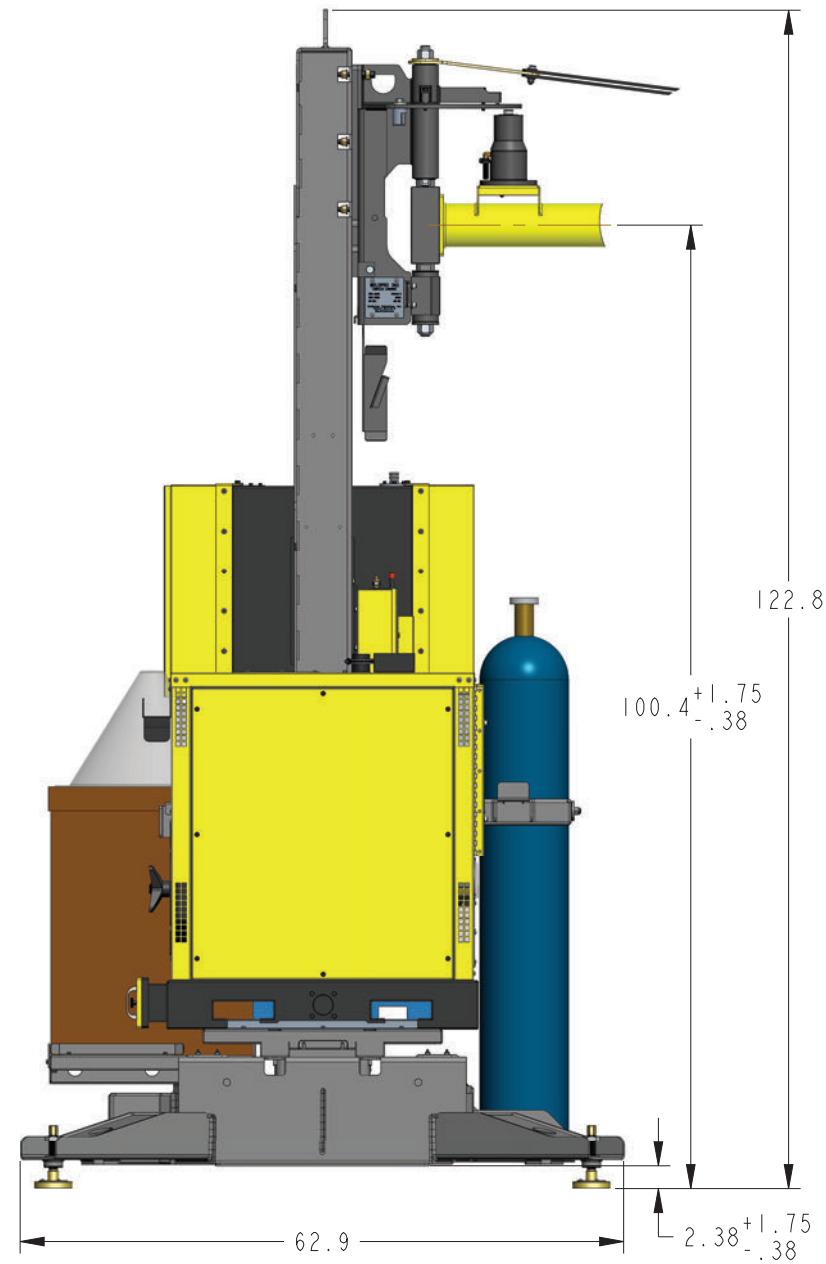

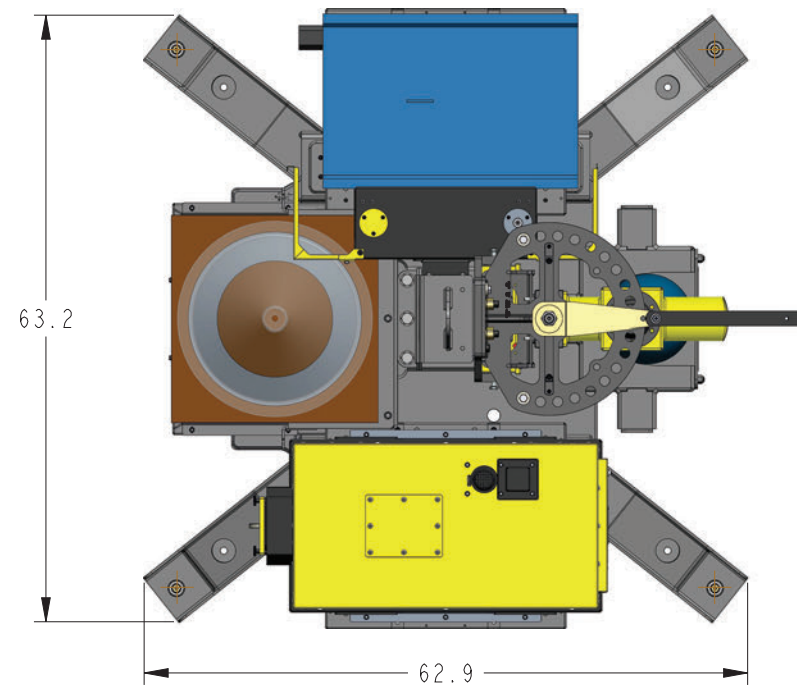

- The Boom Arm Pivot and the Boom Arm Control Box come with the purchased boom arm and simply bolt to the column.
- Weld Wire Spool Cabinet – optional (up to 2 cabinets can be mounted per column) and simply bolt to the column.
- Inert Gas Cylinder Mount—standard, bolts to column.
- Equipment Platform Mount—one provided as standard for mounting the welder power supply. Second platform available for fume extractor or other items of choice.
- Bulk Wire Mount—optional, bolts to the column.
