

# Weld Wire Spool Enclosure

**WELDPRO 360°**

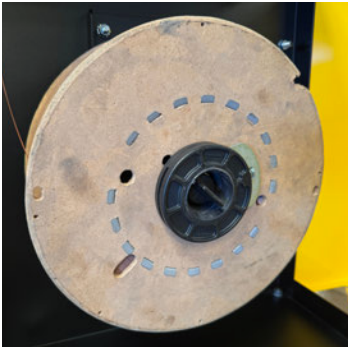

# Product Overview

The Weld Wire Spool Enclosure protects your weld wire from contaminants to deliver a more consistent weld quality, while also increasing the life of wearable parts, like drive rolls. The enclosure can store both 44-lb. and 60-lb. spools. Mounting hardware comes included.

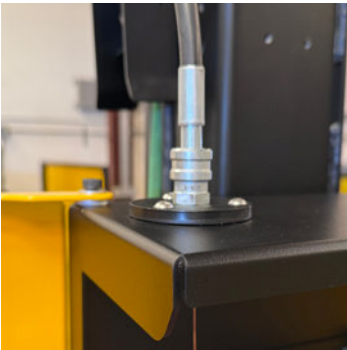

Each WeldPro 360 welding boom column can be equipped with up to two Weld Wire Spool Enclosures, to support dual wire feeder welding setups or to facilitate quick switches between different wire sizes or materials.

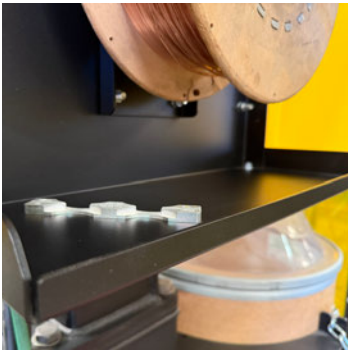

Magnetic catch door system, for reduced wearable components, easy opening, and secure closing

REDI-REEL® spindle adapter facilitates quick and secure loading of weld wire spools

Fully encloses wire from the spool enclosure to the wire feeder, shielding it from dust and other contaminants

18.75" x 7.25" shelf provides 136 in² of storage space for storing welding supplies and tools

# Mounting Details

## Compatible with the following WeldPro 360 Boom Mounting Solutions

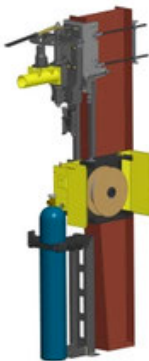

*Freestanding Columns*

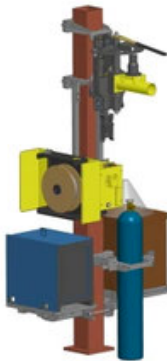

*Floor-Mounted Columns*

*Tapered Building Column Mounts*

*Straight Tube Building Column Mounts*

## Bolt Holt Pattern for mounting to existing building or customer-fabricated structure

Measurements:
